Title: Hiking Companions

Description: A hiking web application that allows hikers to post a hiking plan, find companions, and make friends.

Actors: Admin, Users

Functionality:
1. Users can sign up
2. Administrators and Users can log in
3. Users can change their profiles
4. Users can post a hiking event
5. Admin can post a hiking event to gather users
6. Users can join up hiking events
7. Admin can view hiking events and users within the events

Stretch Functionality:
1. Users can search for other users and add/follow friends
2. Admin can group users for going the same destination
3. Give recommendation to users according to their previous travelling habits/destinations
